

## **2-Step Word Problems on Addition / Subtraction of Money**

**FREE Worksheet - 4**

**Time: 20 minutes**

(Detailed solutions at the end)

---

1. Sylvia collects \$28.75 during a charity drive.

She collects \$12.90 more than Felicia.

Felicia collects \$20.60 less than Mariano.

How much money does Mariano collect?

Answer: \$ \_\_\_\_\_

2. Ellie and Mala each had the same amount of money at first.

Ellie bought a ride-on car for \$56.90 and had \$16.55 left.

Mala bought some stationery for \$33.35.

How much money did Mala have left?

Answer: \$ \_\_\_\_\_

---

3. A water bottle costs \$8.65.

A lunch box costs \$3.75 less.

Gordon wants to buy both the items.

How much money will he need?

Answer: \$ \_\_\_\_\_

4. Bean bags are on sale at a furniture fair.

A bean bag that has a usual price of \$32.00 is selling at a discounted price of \$22.55.

Gilberto buys two such bean bags.

How much discount does he receive altogether?

Answer: \$ \_\_\_\_\_

5. Marvin had \$19.80.

Brenda had \$3.80 more than him.

Brenda spent \$2.70 on a bottle of juice.

How much money had she left?

Answer: \$ \_\_\_\_\_

## SOLUTIONS

### Problem 1

$$\$28.75 - \$12.90 = \$15.85$$

Felicia collects \$15.85.

$$\$15.85 + \$20.60 = \$36.45$$

Mariano collects \$36.45.

**Problem 2**

$$\$56.90 + \$16.55 = \$73.45$$

Ellie and Mala each had \$73.45 at first.

$$\$73.45 - \$33.35 = \$40.10$$

Mala had \$40.10 left.

**Problem 3**

$$\$8.65 - \$3.75 = \$4.90$$

The lunch box costs \$4.90.

$$\$8.65 + \$4.90 = \$13.55$$

He will need \$13.55 to buy both the items.

**Problem 4**

$$\$32.00 - \$22.55 = \$9.45$$

He receives a discount of \$9.45 on one bean bag.

$$\$9.45 + \$9.45 = \$18.90$$

He receives a discount of \$18.90 altogether.

**Problem 5**

$$\$19.80 + \$3.80 = \$23.60$$

Brenda had \$23.60 at first.

$$\$23.60 - \$2.70 = \$20.90$$

Brenda had \$20.90 left.
