

Area of Squares

FREE Worksheet - 1

Time: 15 minutes

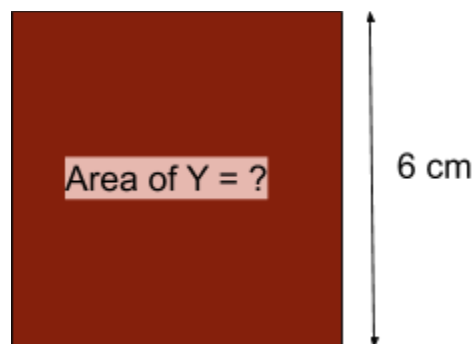

(Detailed solutions at the end)

1. The area of Square A is 81 cm^2 . Find its length.

Answer: ____ cm

2. The length of Square Y is 6 cm. Find its area.

Answer: ____ cm^2

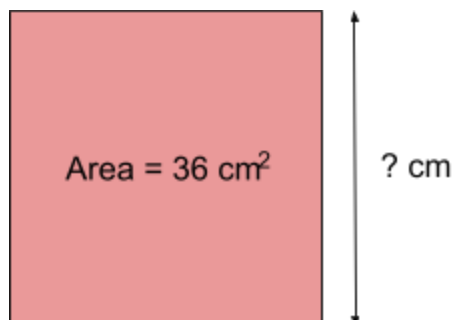

3. Find the area of the square below:

Answer: ____ cm²

4. Find the length of the square below:

Answer: ____ cm

5. The area of a square plot of land is 49 m^2 . Find its length.

Answer: _____ m

SOLUTIONS

Problem 1

Area of a square = Length \times Length

Given, area = $81 \text{ cm}^2 = 9 \text{ cm} \times 9 \text{ cm}$

Therefore, length = ***9 cm***

Problem 2

Area of a square = Length \times Length

Given, length = 6 cm

Therefore, area = $6 \text{ cm} \times 6 \text{ cm} = \mathbf{36 \text{ cm}^2}$

Problem 3

Area of a square = Length \times Length

Given, length = 5 cm

Therefore, area = $5 \text{ cm} \times 5 \text{ cm} = \mathbf{25 \text{ cm}^2}$

Problem 4

Area of a square = Length \times Length

Given, area = $36 \text{ cm}^2 = 6 \text{ cm} \times 6 \text{ cm}$

Therefore, length = **6 cm**

Problem 5

Area of the plot square = $49 \text{ m}^2 = \text{Length} \times \text{Length}$

Given, area = $49 \text{ m}^2 = 7 \text{ m} \times 7 \text{ m}$

Therefore, length = **7 m**
