

2-Step Word Problems on Addition / Subtraction of Money

FREE Worksheet - 5

Time: 20 minutes

(Detailed solutions at the end)

1. An adult ticket at a butterfly park costs \$20.35.

It costs \$12.40 more than a child ticket.

Mrs. Johnson bought an adult ticket and a child ticket.

How much did she pay for the two tickets?

Answer: \$ _____

2. Mrs. Rehman bought a magazine for \$16.65.

She gave the cashier 4 five-dollar notes.

How much change did she receive?

Answer: \$ _____

3. Janice and Annie earn \$71 altogether.

They spend \$20.05 each.

How much money do they have left?

Answer: \$ _____

4. Every day Zoey buys a drink from the vending machine.

She bought a drink for \$1.65 yesterday.

She bought a drink for \$0.25 more today.

How much did she spend at the vending machine in the two days?

Answer: \$ _____

5. A pen holder costs \$9.20.

A fridge magnet costs \$3.15 less.

Marco wants to buy both the items.

How much money will he need?

Answer: \$ _____

SOLUTIONS

Problem 1

$$\$20.35 - \$12.40 = \$7.95$$

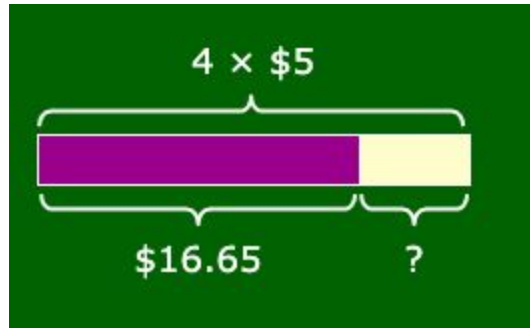

A child ticket costs \$7.95.

$$\$20.35 + \$7.95 = \$28.30$$

She paid \$28.30 for the two tickets.

Problem 2

$$4 \times \$5 = \$20$$

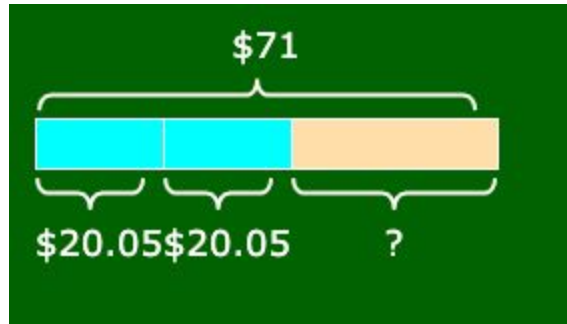

She gave \$20 to the cashier.

$$\$20.00 - \$16.65 = \$3.35$$

She received a change of \$3.35.

Problem 3

$\$20.05 + \$20.05 = \$40.10$
They spend \$40.10 altogether.

$\$71 - \$40.10 = \$30.90$
They have \$30.90 left.

Problem 4

$$\$1.65 + \$0.25 = \$1.90$$

She spent \$1.90 today.

$$\$1.65 + \$1.90 = \$3.55$$

She spent \$3.55 in the two days.

Problem 5

$$\$9.20 - \$3.15 = \$6.05$$

The fridge magnet costs \$6.05.

$$\$9.20 + \$6.05 = \$15.25$$

He will need \$15.25 to buy both the items.
