

Area of Squares

FREE Worksheet - 4

Time: 15 minutes

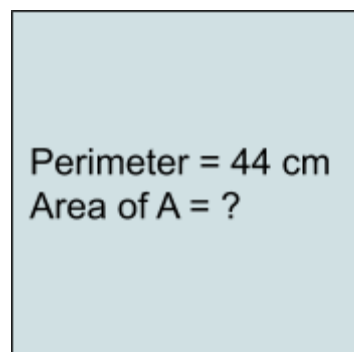

(Detailed solutions at the end)

1. The length of Square X is 9 cm. Find its area.

Answer: _____ cm²

2. The perimeter of Square A is 44 cm. Find its area.

Answer: _____ cm²

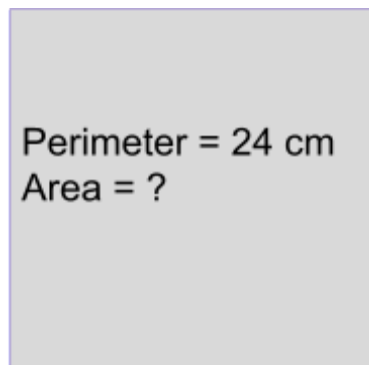

3. Find the area of the square below:

Answer: _____ cm²

4. Find the area of the square below:

Answer: _____ cm²

5. The perimeter of a square tile is 44 cm. Find its area.

Answer: _____ cm²

SOLUTIONS

Problem 1

Area of a square = Length \times Length

Given, length = 9 cm

Therefore, area = 9 cm \times 9 cm = **81 cm²**

Problem 2

Perimeter of a square = 4 \times Length

Length = Perimeter \div 4

Given, perimeter = 44 cm

Therefore, length = 44 cm \div 4 = 11 cm

Area of a square = Length \times Length

Given, length = 11 cm

Therefore, Area = 11 cm \times 11 cm = **121 cm²**

Problem 3

Area of a square = Length \times Length

Given, length = 7 cm

Therefore, area = 7 cm \times 7 cm = **49 cm²**

Problem 4

Perimeter of a square = 4 \times Length

Length = Perimeter \div 4

Given, perimeter = 24 cm

Therefore, length = 24 cm \div 4 = 6 cm

Area of a square = Length \times Length

Given, length = 6 cm

Therefore, Area = 6 cm \times 6 cm = **36 cm²**

Problem 5

Perimeter of the square tile = 4 \times Length

Length = Perimeter \div 4

Given, perimeter = 44 cm

Therefore, length = 44 cm \div 4 = 11 cm

Area of the square tile = Length \times Length

Given, length = 11 cm

Therefore, Area = 11 cm \times 11 cm = **121 cm²**
