Area in Square Meters/Centimeters

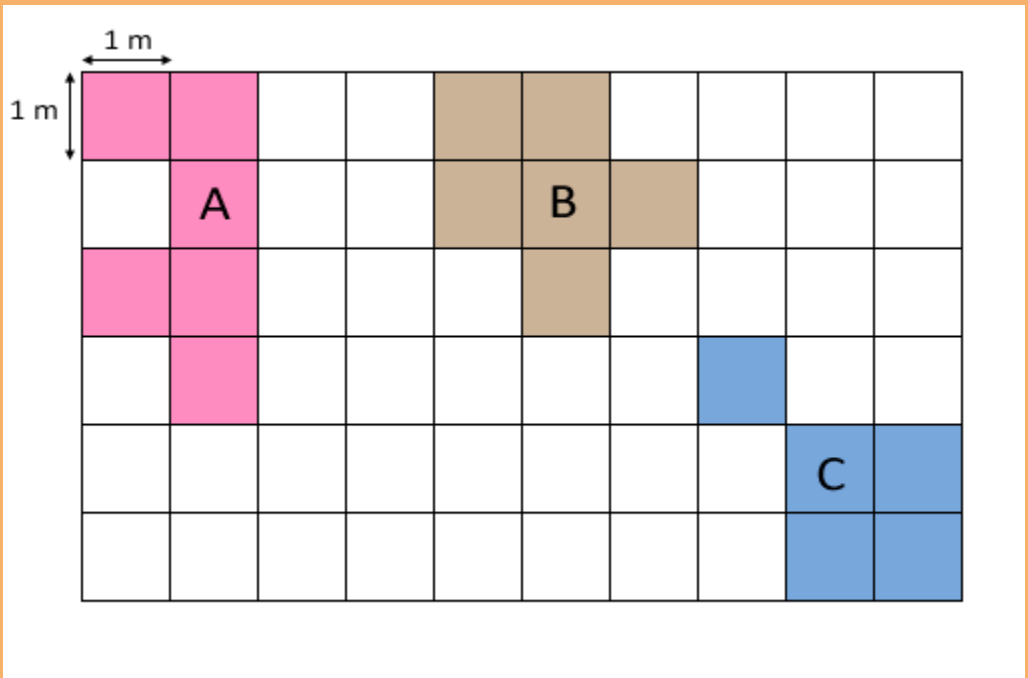
FREE Worksheet - 4

Time: 20 minutes

(Detailed solutions at the end)

---

1. Which of the figures below has the smallest area?

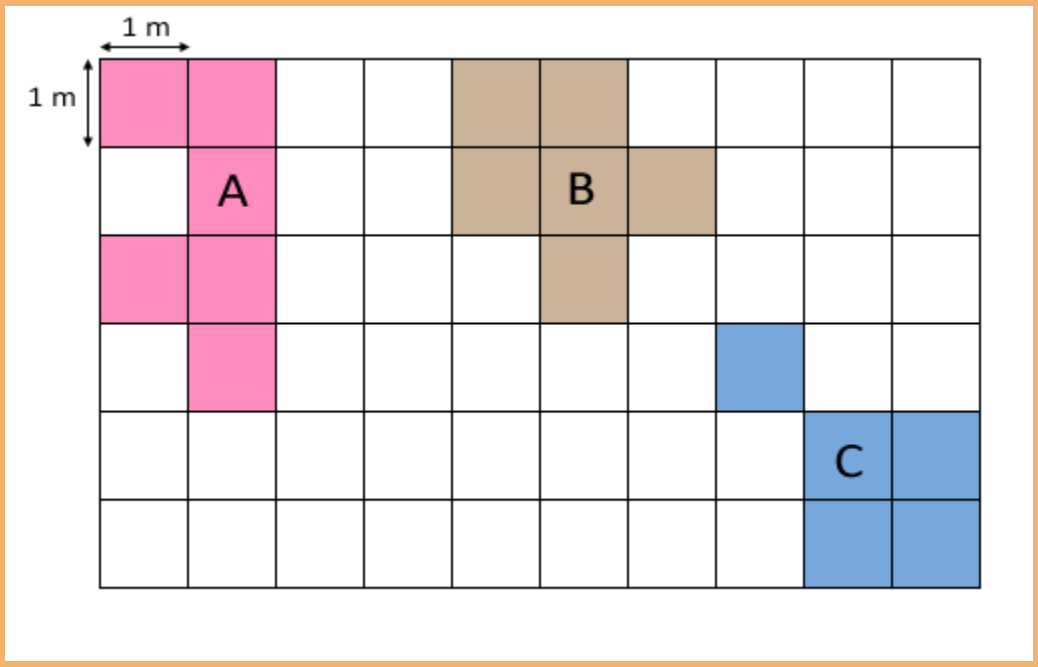


a. Figure A

b. Figure B

c. Figure C

2. Which figure has an area of 5 m^2?

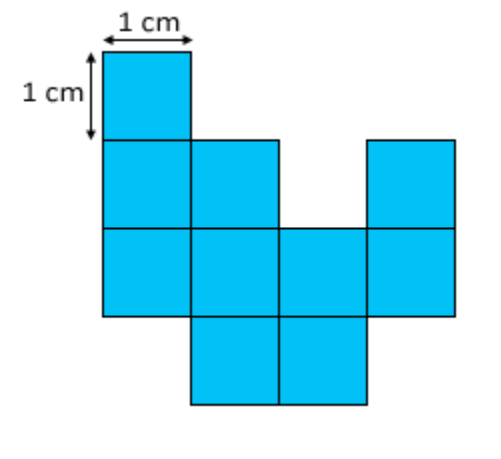


a. Figure A

b. Figure B

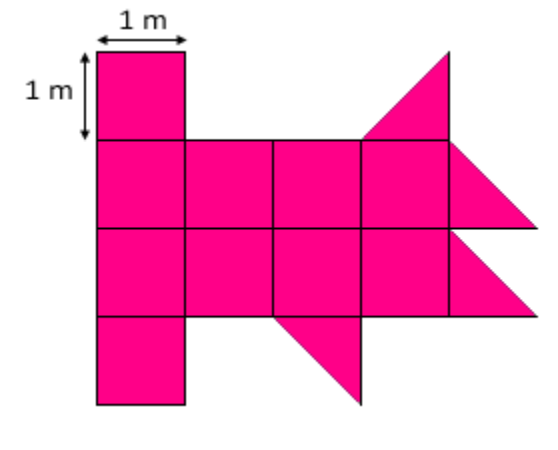
c. Figure C

3. What is the area of the shaded figure below?



Answer: _____ cm^2

4. What is the area of the shaded figure below?



Answer: _____ m^2

5. The area of a football field is 7140 ____. Choose the correct unit.

   a. cm^2

   b. m^2

SOLUTIONS

Problem 1

Number of shaded squares in Figure A = 6
Area of Figure A is 6 m^2.

Number of shaded squares in Figure B = 6
Area of Figure B is 6 m^2.

Number of shaded squares in Figure C = 5
Area of Figure C is 5 m^2.

So, ***Figure C*** has the smallest area.

Problem 2

Number of shaded squares in Figure A = 6
Area of Figure A is 6 m^2.

Number of shaded squares in Figure B = 6
Area of Figure B is 6 m^2.

Number of shaded squares in Figure C = 5
Area of Figure C is 5 m^2.

So, ***Figure C*** has an area of 5 m^2.

Problem 3

Number of shaded squares in the figure = 10

The figure is made up of 10 1-cm squares.

The area of each 1-cm square is 1 cm^2.

So, the area of the shaded figure is 10 cm^2.

Problem 4

Number of full shaded squares in the figure = 10

Number of half shaded squares in the figure = 4 = 2 full shaded squares

Total number of shaded squares in the figure = 10 + 2 = 12

The figure is made up of 12 1-m squares.

So, the area of the shaded figure is 12 m^2.

Problem 5

A football field that has an area of 7140 cm2 would be too small to play on!
